Who We Are

AL FALAK Wood Industries, we manufacture high-quality wooden pallets, crates, and custom packaging, providing durable, eco-friendly solutions for businesses of all sizes.

**Quality
Craftsmanship**

**Eco-Friendly
Solutions**

**Customizable
Products**

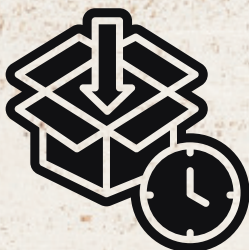

Reliability

We provide high-quality wooden pallets and custom wood solutions tailored to customer needs. Our products ensure secure packaging, smooth logistics. With a focus on excellence, safety, and sustainability, we deliver innovative, eco-friendly wood solutions for various industries.

Our Services

At AL Falak Wood Industry, we go beyond just supplying pallets. We provide comprehensive services to ensure seamless operations for our clients.

On-Site Packing Solutions

Heat Treatment (ISPM-15 Certified)

Recycling of Used Wood Pallets

Our Products

We manufacture a wide range of **high-quality wooden pallets**, designed for **transportation, logistics, warehousing, and industrial applications**. Our pallets meet **international safety and durability standards**, ensuring **optimal strength and sustainability**.

STANDARD WOODEN PALLET

The most commonly used pallets, typically measuring 48" x 40". Constructed from high-quality timber, they offer durability and reliability.

Key Features:

- **Dimensions:** Standard size of 48" x 40".
- **Load Capacity:** Can hold up to 4,600 lbs.
- **Entry Points:** Two-way or four-way entry options for forklifts and pallet jacks.
- **Cost-Effective:** Can be reused, repaired, and recycled.

Ideal For: General warehousing, retail distribution, and light to medium weight goods.

BLOCK PALLET (HEAVY-DUTY & MULTI-DIRECTIONAL USE)

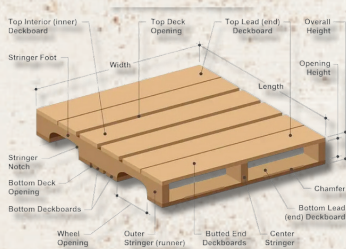

Block Pallets are known for their 4-way forklift entry. These pallets have blocks instead of stringers, allowing lifting from all four sides. Known for their strength and durability.

Key Features:

- **Construction:** Utilizes both parallel and perpendicular stringers for enhanced strength.
- **Accessibility:** Four-way entry design facilitates efficient handling.
- **Material:** Made with strong wood or reinforced materials for high load capacity.

Ideal For: Heavy-duty applications, manufacturing, and industries requiring robust pallet solutions.

STRINGER PALLET

Stringer Pallets are lightweight yet durable, designed with two or three parallel beams (stringers) to provide solid structural integrity.

Key Features:

- **Design:** Two parallel stringers support the top deck boards.
- **Variations:** Available in reversible and non-reversible designs.
- **Cost-Effective:** Generally more affordable than block pallets.

Ideal For: Light to medium load applications, retail, and warehousing.

Wooden Pallets

HEAVY-DUTY PALLETS

Heavy-Duty Pallets are engineered to handle extremely heavy loads in industrial settings.

Key Features:

- **Supports Over 1 Ton of Weight:** Ideal for heavy cargo.
- **Made from Reinforced Wood & HDPE Materials:** Highly durable and impact-resistant.
- **Reusable & Long-Lasting:** Designed for long-term industrial use.

Ideal For: Machinery Transport, Automotive Industry, Warehouses.

HYBRID PALLETS (SPACE-SAVING & MULTI-PURPOSE)

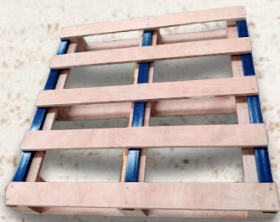

Hybrid Pallets combine features of different pallet types to create a flexible, customizable storage solution.

Key Features:

- **Adjustable Sizes for Different Applications:** Ideal for various product categories.
- **Anti-Humidity & Termite Resistant:** Protects products from moisture & decay.
- **Secure Design with Padlocks & Tags:** Enhances security and tracking.

Ideal For: Retail, Warehousing, High-Density Storage.

PERIMETER BASE PALLETS

Perimeter Base Pallets are designed with runners on all four sides, providing enhanced stability and strength for various storage and transportation needs.

Key Features:

- **Stability:** Enhanced load stability due to the full-perimeter base.
- **Smooth Deck Design:** A solid top surface facilitates better weight distribution.
- **Compatibility:** Ideal for automated handling systems.

Ideal For: Warehousing, distribution centers, retail storage, food & beverage industry and industries utilizing automated storage and retrieval systems.

Wooden Pallets

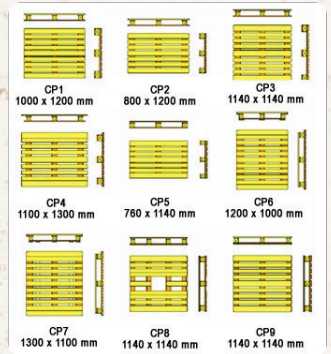

CP PALLETS (CHEMICAL PALLETS)

CP Pallets are designed specifically for the chemical industry, providing durable storage and transportation solutions for hazardous materials.

Key Features:

- **Heat-Treated & Chemical Resistant:** Designed to withstand exposure to chemicals.
- **Variety of Sizes (CP1 – CP9):** Engineered for different types of storage needs.
- **Moisture & Decay Resistant:** Ideal for storing liquids, and raw materials.

Ideal For: Pharmaceuticals, Chemical Industry, Agriculture, etc.

EURO PALLETS (EPAL CERTIFIED)

Euro Pallets are internationally recognized for their standardized size (1200 x 800 mm) and high load capacity. These pallets are essential for businesses involved in global trade and comply with European Pallet Association (EPAL) standards.

Key Features:

- **Standardization:** Complies with European Pallet Association (EPAL) standards.
- **Load Capacity:** Designed to handle heavy loads.
- **Versatility:** Suitable for various industries and applications.

Ideal For: International shipping, especially within Europe, and industries requiring standardized pallet sizes.

DOUBLE-WING PALLETS (EXTENDED DESIGN FOR EXTRA STABILITY)

Double-Wing Pallets are engineered for enhanced strength, featuring wings extending beyond the pallet's base.

Key Features:

- **Extra-Wide Deck for Load Distribution:** Prevents tipping and damage.
- **Strong, Lightweight Material:** Easy to handle while ensuring high load capacity.
- **Termite & Moisture Resistant:** Increases pallet lifespan.

Wooden Pallets

FUMIGATED PALLETS (ISPM 15 CERTIFIED)

Fumigated Pallets are treated with heat or methyl bromide to prevent pest infestations, ensuring compliance with international phytosanitary regulations.

Key Features:

- **Treatment:** Heat-treated or fumigated to meet ISPM 15 regulations.
- **Eco-Friendly Treatment:** Ensures safe and chemical-free storage.
- **Pest & Moisture Resistant:** Protects against decay, and wood-boring insects.

Ideal For: Exporting goods like Food & Pharmaceuticals, internationally, especially where phytosanitary regulations are strict.

Wooden Cargo Boxes & Crates

Wooden cargo boxes offer strong, durable, and secure storage for shipping. Built to withstand pressure and tough conditions, they protect goods from damage, ensuring safe transit.

Key Features

- **Superior Strength & Durability** – Made from high-quality wood, reinforced with screw nails and fasteners for added stability.
- **Stackable & Space-Efficient** – Can be introduced in storage up to 8 levels, optimizing space in warehouses and shipping containers.
- **Protection from External Factors** – Shields cargo from moisture, impact, and external exposure, ensuring product safety.
- **Customizable Designs & Sizes** – Tailored to meet specific shipping requirements for various industries.
- **Compliant with Export Regulations**

Why Choose Us?

AL FALAK WOOD INDUSTRY

STRENGTH IN EVERY STACK

➤ Unmatched Quality & Durability

Built to last longer & perform better.

➤ Custom Solutions for Every Industry

We tailor pallets to fit your needs.

➤ Environmentally Responsible Manufacturing

Sustainable & recycled materials.

➤ Fast & Reliable Delivery

Ensuring timely & efficient supply.

➤ Global Standards Compliance

Certified & approved for export & logistics.
